

Nashville Dream - Tennent's Well of Fire
Dreamed 08/26/21
Greg Hood

This afternoon as I napped, I dreamed the following:

In the dream Dutch and I found ourselves back at the Tennent's Well of Fire. It was still blowing fire high into the sky. Gabriel the Archangel was there with us also. The Well was not in the middle of the large field of oil type wells as it was before. It was here in Nashville. Nashville did not look like the Nashville we know as we look around the city but it appeared to be built on the ocean. Tennent's Well of Fire looked a little different than before. It now was a platform Well. We knew in the dream that this large body of water was a new water. A water that had never been drilled in before. Gabriel said to us as we stood there on the Well's large platform, "Its your Father's intent to drill deeper with this Well, than it has ever drilled. We have made the modifications needed to do so." We could then see many, many angels working on and around this Well, moving things; cutting things away from it as well as seeing them do what looked like welding things to it. Gabriel continued saying, "The water and the clay here in Nashville is ready to receive for drilling. You will have to use your 601 bit here. It will take some effort but you will push through. The clay is ready." Gabriel went on to say, "The bit is still activated with the same code you used before. Give Kent the code. He has been working from this drilling platform for 22 years. The platform is ready and his crew of roughnecks are ready!"

Dutch pulled a small brown leather-bound book from his pocket and handed it to me and said, "Hood, take this code book to Kent on the drill tower. Tell him not to be alarmed at the size of the code book. It is small but powerful. Tell him he will need to pull the sound from deep within himself. That's where the 601 gets it's power." I took the code book to Kent, gave him the instruction I was given and made my way back to where Dutch was.

Gabriel said, "follow me." We begin to make our way up a staircase into the heart of the Tennent's Well of Fire. It seemed a little odd in the dream because we knew we were climbing stairs but it seemed we were going deeper into the Well. We arrived at a large conglomeration of valves that were attached to the operations of the Well. Gabriel said to Dutch, " These two valves are very important to the success of this Well accomplishing it's mission. You do know that "Mission New Water-Deep Drill" is in full motion, right? This Well is built to blow! Monitor these two valves and keep the pressure just right. Adjustments will be needed as you drill. This process will be quick and fierce." Dutch then replied to Gabriel, "We can do that." I could see the look of nervousness on Dutch's face as he looked at the valves. Gabriel leaned into Dutch and whispered in his ear, "Dutch you were built for this. The Ekklesia is no longer in boot camp. She's in "Her Day."

As we begin to examine and look over these two valves, we could see that each valve had a name written on it. One had "BOP" written on it and the other one had "RAM in the bush" written on it (with RAM in all caps).

Dutch shouted to Kent, "THE PRESSURE IS RIGHT. START THE DRILL!" Kent then stood to his feet on the drilling tower, opened the code book and began to preach from Hebrews 12:25-29 to set the 601 into motion. It began to spin and immediately moved through the water and hit the clay.

Gabriel then said to me in the dream, "Greg, put these glasses on, go to the edge of the platform, lean over and look into the water. You will be able to see the 601's activity. You will be able to give direction as it drills. The bit must not destroy the clay. It must shape it.

Dutch shouted to me, "Hood, what do you see?" I replied, "I see the bit shaping the clay in the water. The clay is men. The floor of this vast body of water are men. Men being reshaped for the fire from this New Tennent's Well of Fire.

Gabriel said, "Dutch, keep the pressure at the right mark. It will increase and it will need to be decreased at times. The pressure is important. There are other cities in America that the Water level is almost right. You will find this Well in those places too. You know the operational procedure now. This Well is Key." Nashville is a first fruit from this well. End of Dream
